## Teeth Cleaning - Dental Report Card

### Stage 1 Mild gingivitis:

The margin of attached gums is **inflamed and swollen**. Plaque and calculus are present. Home dental care is needed. Dental cleaning is needed within the next month to remove plaque buildup and prevent progression of dental disease. **[Dental promotion 1, 2 or 3 available]**

### Stage 2 Moderate gingivitis:

The entire gum is inflamed and swollen. **The mouth is painful** and odor is noticeable; tooth roots have lost up to 25% of their attachment. Bacteria begins to impact other body organs. Dental cleanings needed as soon as possible, followed by a calculus control diet and home dental care to prevent future tooth loss and pain. **[Dental promotion 2 or 3 available]**

### Stage 3 Severe gingivitis:

The gums are cherry red and bleeding, damaged by infection and calculus. **A sore mouth** and bad breath are evident. Heart valves and kidneys are exposed to bacteria and may be experiencing inflammation and damage. Dental cleaning is needed immediately to remove calculus, along with antibiotics and pain medication. Extractions are likely. **[Dental promotion 2 or 3 available]**

### Stage 4 End stage periodontal disease:

Chronic infection is destroying the gums, teeth and bone. Many teeth are loose. Bacteria are spreading through the body and heart, liver and kidneys are compromised. **Pain is constant**. Dental cleaning is needed immediately to remove calculus. Extraction, antibiotics, and pain medications will be necessary. **[Dental promotion 2 or 3 available]**

**NICE JOB !!!!! NO SIGN OF PLAQUE OR CALCULUS**
